

Meet the Manzo Brothers, The Real House Wives of New Jersey stars, The latest celebrities to show up on the **Men's Luxury Mobile by Bucco**

Super 100's 120's 150's and up...what does it really mean?

Super any number means: How much one gram of wool or any of that fabric will extend, meaning that the smaller the number, the heavier the fabric. The number refers to the fineness of the wool as measured in microns. Fineness is just one quality component: Length strength, color, and crimp are also important, with the first two particularly so. Length is critical because the longer the fiber, the stronger the yarn that can be spun from it. For the record, Super 100's and up does not mean the stitch count is the fineness of the thread. Just know where the material comes from.

Why Custom is Key

Custom clothing is not only a statement but a staple. If you have custom clothing it will fit to your unique body type and give you more options to coordinate other pieces into your wardrobe. Custom will also give you the confidence in the work place or socially. You know you look good in custom because it allows you to create a more refined you! At the home or at the office these pieces are not only a perfect fit on, but a perfect fit in your closet
